Adventures In Experience Design Web Design Courses:

Adventures in Experience Design Carolyn Chandler, Anna Van Slee, 2014 Whether teaching or learning UX Design activities often sink in deeper than lectures And game like activities with a lesson included both engage and instruct This book contains fun and challenging activities to help participants learn core concepts in user experience from sketching to photo safaris that encourage field observation to creating an experience model for your daily bus ride etc It is structured as 50% activity and 50% explanation

Modular Web Design Nathan Curtis, 2010-04-07 User experience design teams often suffer from a decentralized blank canvas approach to creating and documenting a design solution for each new project As teams repeatedly reinvent screen designs inconsistency results and IT teams scramble to pick up the pieces Pattern libraries only go so far suggesting general solutions to common problems instead of offering concrete specific design treatments At times documented solutions turn into a costly mess of unclear expectations unrealistic goals and abandoned work Enter components each of which represents a chunk of a Web page Designers can produce wireframes mockups or markup far more efficiently reusing components based on an established design system Rather than limit innovation components enable designers to render solved design frameworks quickly and to focus on the problem at hand drastically improving the quality and rate of production In addition teams develop a deeper baseline for collaboration a platform for governance and a structure for useful and predictable documentation This book defines the role of components and why they matter maps out how to organize and build a component library discusses how to use components in practice and teaches a process for documenting and maintaining components
