This Ring Tester is an inexpensive and effective way to test any high-Q inductive component. It is especially useful for doing a quick check on flyback, line output transformers and other high frequency wound components like deflection yoke windings and SMPS transformers.

The LEDs on the left side show the Q of the device being tested, the more lights = the higher Q:

No Lights = Short Circuit,
Red = Bad or Low Q,
Yellow = Marginal/Medium Q,
Green = Good or High Q.
